

ALL KINDS OF THINGS CAN GET BETWEEN YOUR TYRES AND THE SURFACE...

YOU KNOW THE DRILL BY NOW, LET'S FIND OUT...

- SIGH -

AFTER HEAVY RAIN, WATCH OUT FOR WATER AND DEBRIS OVERFLOWING FROM STORM DRAINS

HEAVY RAIN CAN ALSO WASH MUD AND SAND, AND EVEN GRAVEL ONTO THE ROAD. WATCH OUT ON STEEP HILLS, PARTICULARLY AT THE DIP AT THE BOTTOM...

ALL SORTS OF OBJECTS END UP ON THE ROAD. FOR EXAMPLE, TRUCKS CAN LOOSE PART OF THEIR LOAD...

WHERE ACCIDENTS OCCUR, BROKEN GLASS, SPILLED FLUIDS AND BITS OF BODYWORK ARE OFTEN LEFT AROUND.

LOOK OUT NEAR QUARRIES AND BUILDING SITES, OR WHERE UNSURFACED ROADS JOIN THE ASPHALT...

STRONG WINDS CAN BLOW SAND AND DUST ONTO THE ROAD AND BRING DOWN LARGE BRANCHES OR SOMETIMES EVEN TREES...

EXTRA ATTENTION IS THEN NEEDED TO KEEP ENJOYING THE RIDE...

...AND SOMETIMES SOME CREATIVITY CAN ALSO HELP...

BUT DON'T TRY THIS AT HOME...IT ONLY WORKS IN CARTOONS...
